- **Faucets and Sink:** Nob Hill Decorative Hardware
- **Cabinets:** Euro Builders & Remodelers Inc.
- **Appliances:** Wolf and KitchenAid
- **Granite:** Arizona Tile and Euro Granite Designs

THE TEAM

Design and General Contractor: Melinda Dzinic

Project Engineer: Seval Dzinic

Stone Master: Ivica Lukic

Construction: Euro Builders & Remodelers Inc.

THE MISSION

Find a way to add an island to create more work space in a very small kitchen with no option for enlargement. Provide more cabinet space for pots and pans and spice storage with improved lighting over the existing cooktop area.

THE DESIGN

Removing half of the existing bar and reframing it for a large peninsula instead of trying to incorporate an island was the perfect solution to creating more work space. Lack of storage was addressed with a custom cabinet that houses a new six-burner gas cooktop and a pullout cabinet for spices. Below the cooktop, beautiful doors now hide two large drawers for pots and pans. A full 42-inch up-draft vent with a decorative hood solved the ventilation problem.
